

Figs are inverted flowers,

and your liver can age up to a 107 years older than you are.

Fresh dates only grow out of corpses,

and the space between the two front teeth darkens when you drink black tea.

The vibration of every sound wave is eternal,

but you only drown once.

You can choke on your spit,

but you're not allowed to be hungry.

You can pull a girl out of a mother,

but you can never pull a mother out of a girl.

The red on the lips fades when you eat,

and also when you die

There's no one left to pick the daffodils.
